To Whom It May Concern;

As Communications Director for Hall County Georgia, I write with the following request. Hall County desires to consolidate call signs associated to 800MHz conventional frequencies. These call signs had been licensed independently of one another over the process of the last year and consolidation of the same will make future license management simpler for both Hall County as well the FCC.

Recently, the Commission licensed Hall County with call signs **KNNM753**, **WNAY623**, & **KNIV903**. These stations are now built out in a conventional manner and serve local Law Enforcement efforts through mobile access to files and data. At the time of assignment for these call signs, there were no Public Safety (PW) frequencies available.

Hall County is presently licensed for call sign **WPWK928** as well. The construction of this station will be completed for conventional use within the next nine months. It is the County's desire to consolidate all frequencies associated with these call signs on the **WPWK928** call sign for file management and renewal purposes.

Thank you in advance for your continued support and cooperation.

Cordially,

A handwritten signature in cursive script, appearing to read "Bob Anderson".

Bob Anderson
Director of Communications
Hall County Georgia
